Biotechnology and Bioengineering

Volume 66, 1999

Volume 66, Number 1, 1999

1 Mathematical Modeling and Optimization of Cellulase Protein Production Using *Trichoderma reesei* RL-P37
A. Tholudur, W.F. Ramirez, and J.D. McMillan

17 Cutinase: From Molecular Level to Bioprocess Development
C.M.L. Carvalho, M. R. Aires-Barros, and J.M.S. Cabral

35 Substrate Heterogeneity Causes the Nonlinear Kinetics of Insoluble Cellulose Hydrolysis
S. Zhang, D.E. Wolfgang, and D.B. Wilson

42 Steady-State and Transient-State Analysis of Growth and Metabolite Production in a *Saccharomyces cerevisiae* Strain with Reduced Pyruvate-decarboxylase Activity
M.T. Flikweert, M. Kuyper, A.J.A. van Maris, P. Kötter, J.P. van Dijken, and J.T. Pronk

51 Synergistic Interactions Among β-laminarinase, β-1,4-Glucanase, and β-Glucosidase from the Hyperthermophilic Archaeon *Pyrococcus furiosus* During Hydrolysis of β-1,4-, β-1,3-, and Mixed-Linked Polysaccharides
L.E. Driskill, M.W. Bauer, and R.M. Kelly

61 Secretion-Dependent Proteolysis of Heterologous Protein by Recombinant *Escherichia coli* Is Connected to an Increased Activity of the Energy-Generating Dissimilatory Pathway
M. Schmidt, E. Viaplana, F. Hoffmann, S. Marten, A. Villaverde, and U. Rinas

Volume 66, Number 2, 1999

69 Bidirectional Reaction Steps in Metabolic Networks: III. Explicit Solution and Analysis of Isotopomer Labeling Systems
W. Wiechert, M. Möllney, N. Isermann, M. Wurzel, and A.A. de Graaf

86 Bidirectional Reaction Steps in Metabolic Networks: IV. Optimal Design of Isotopomer Labeling Experiments
M. Möllney, W. Wiechert, D. Kownatzki, and A.A. de Graaf

104 Metabolic Shifts by Nutrient Manipulation in Continuous Cultures of BHK Cells
H.J. Cruz, J.L. Moreira, and M.J.T. Carrondo

114 Determination of Growth and Lysis Kinetics in Plant Cell Suspension Cultures from the Measurement of Esterase Release
N. Steward, R. Martin, J.M. Engasser, and J.L. Goergen

122 Microbial Reduction of Technetium by *Escherichia coli* and *Desulfovibrio desulfuricans*: Enhancement via the Use of High-Activity Strains and Effect of Process Parameters
J.R. Lloyd, G.H. Thomas, J.A. Finlay, J.A. Cole, and L.E. Macaskie

COMMUNICATION TO THE EDITOR

131 Alkaline Biocatalysis for the Direct Synthesis of *N*-Acetyl-D-Neuraminic Acid (Neu5Ac) from *N*-Acetyl-D-Glucosamine (GlcNAc)
S. Blayer, J.M. Woodley, M.J. Dawson, and M.D. Lilly

Volume 66, Number 3, 1999

137 Adsorptive Control of Water in Esterification with Immobilized Enzymes. Continuous Operation in a Periodic Counter-Current Reactor
P. Mensah and G. Carta

147 A Simple Structured Model for Maintenance, Biomass Formation, and Ajmalicine Production by Nondividing *Catharanthus roseus* Cells
J.E. Schlatmann, H.J.G. ten Hoopen, and J.J. Heijnen

158 Preliminary Study of Real-Time Fiber Optic Based Protein C Biosensor
J.O. Spiker and K.A. Kang

164 Genetically Structured Modeling of Protein Production in Filamentous Fungi
T. Agger and J. Nielsen

171 Control of pH in Large-Scale, Free Suspension Animal Cell Bioreactors: Alkali Addition and pH Excursions
C. Langheinrich and A.W. Nienow

180 Prolonging Cell-Free Protein Synthesis with a Novel ATP Regeneration System
D.-M. Kim and J.R. Swartz

189 Analysis and Use of Endogenous Nuclease Activities in *Escherichia coli* Lysates During the Primary Isolation of Plasmids for Gene Therapy
G.A. Monteiro, G.N.M. Ferreira, J.M.S. Cabral, and D.M.F. Prazeres

195 Rapid Quantitation and Monitoring of Plasmid DNA Using an Ultrasensitive DNA-Binding Dye
I.S. Noites, R.D. O'Kennedy, M.S. Levy, N. Abidi, E. Keshavarz-Moore

Volume 66, Number 4, 1999

203 Effect of Organic Acids on the Growth and Fermentation of Ethanologenic *Escherichia coli* LY01
J. Zaldivar and L.O. Ingram

211 Novel Polymer–Polymer Conjugates for Recovery of Lactic Acid by Aqueous Two-Phase Extraction
J. Planas, A. Kozlowski, J.M. Harris, F. Tjerneld, and B. Hahn-Hägerdal

219 Development of a Bioartificial Pancreas: I. Long-Term Propagation and Basal and Induced Secretion from Entrapped βTC3 Cell Cultures
K.K. Papas, R.C. Long, Jr., A. Sambanis, and I. Constantinidis

231 Development of a Bioartificial Pancreas: II. Effects of Oxygen on Long-Term Entrapped βTC3 Cell Cultures
K.K. Papas, R.C. Long, Jr., A. Sambanis, and I. Constantinidis

238 Improvement of the Primary Metabolism of Cell Cultures by Introducing a New Cytoplasmic Pyruvate Carboxylase Reaction
N. Irani, M. Wirth, J. van den Heuvel, and R. Wagner

247 Thermoseparating Water/Polymer System: A Novel One-Polymer Aqueous Two-Phase System for Protein Purification
H.-O. Johansson, J. Persson, and F. Tjerneld

258 Modeling and Simulation of Competition Between Two Microorganisms for a Single Inhibitory Substrate in a Biofilm Reactor
S. Soda, E. Heinzle, and M. Fujita

COMMUNICATION TO THE EDITOR

265 Catalytic Activity and Conformation of Chemically Modified Subtilisin Carlsberg in Organic Media
O.H. Kwon, Y. Imanishi, and Y. Ito

271 In Appreciation

274 Indexes to Volume 66
